PORTABLE GENERATORS

When a power outage occurs, when a disaster strikes, when you need power at a remote location, a portable generator guarantees you a source of electricity.

Portable generators are gas-powered machines that provide you with the power you need anywhere you are. Power outlets on the unit allow you to plug in extension cords, electric-powered tools, and appliances.

While many people buy a generator in the event of a power outage at their home or business, a portable generator allows you to bring power where none is available.

Generators have a range of capabilities based on starting watts and running watts.

Running watts refers to the continuous power a generator can supply, and starting watts refers to the momentary boost of power the generator can supply to start a motor.

SUA12000E

OVERVIEW SUA12000E PORTABLE GENERATOR

- 12,000 Starting Watts
- 9,000 Running Watts
- 2-Year Residential/I-Year Commercial
- 459cc/16hp OHV Engine
- 12V Multifunction Port; 1 12VDC
 8.3A Adaptor Plug / USB Ready –
 new for 2017
- Full GFCI Outlets; 2 NEMA 120VAC 20A, GFCI protected new for 2017
- Electric Start
- Runs for 9 Hours at 50% Load
- Factory-Installed Handle
- Enough power for emergency use and more
